

WELDED RIBBON STRIP

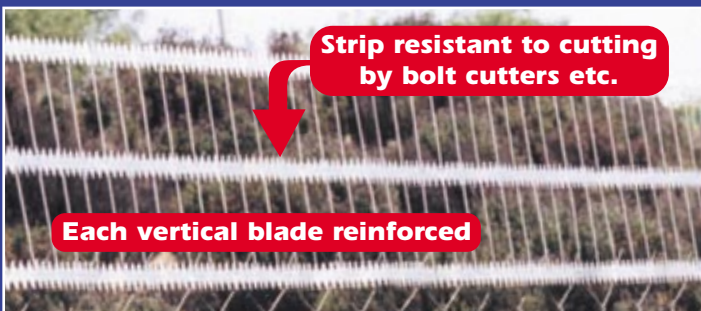

Neat yet excellent security

Compact-quick installation

Vertical blades designed to penetrate blankets, canvas, etc.

Strip resistant to cutting by bolt cutters etc.

Each vertical blade reinforced

THE CONCEPT

Strips of profiled ribbon mesh/spikes are electrically welded to high tensile galvanised separators to form a neat yet very effective anti-intrusion barrier.

Easy to install the barrier is harmless to innocent persons (there is no overhang into neighbouring property). The vertically mounted spikes are reinforced to penetrate protective fabrics utilised by intruders.

The flat steel strip is resistant to cutting by bolt cutters.
